Base for surface mount box for frame with 2 rows for 4 elements white Simon 27 Centralisations

REF. **27861-35**

BASIC INFORMATION

DESCRIPTION

This surface-mounted box base is from the Simon 27 Centralisations series and is specially designed for frame of 2 rows. With a surface of 179 x 150 millimetres and a depth of 40 millimetres, this base stands out above all for its functionality, since it can give current to 4 elements. This makes it ideal for installing in places and rooms with a large concentration of electrical equipment such as in the kitchen of the home, where there are several appliances to connect, or in an office with computers, printers, etc. The base of the surface-mounted box for frame consists of a total of eight modules distributed over two rows ,but is very easy to install. It can also be done in both vertical and horizontal. Maintenance and cleaning is also simple, and you only need to use a cloth moistened in soapy water - it will be impeccable. The product is made of thermoplastic, which gives it a high resistance to heat.

FINISH

White

MATERIAL

Plastic
