Cover with viewer for mechanical or electronic card switch graphite Simon 27 Play

REF. **27078-38**

BASIC INFORMATION

DESCRIPTION

Lids on electrical systems are the best way to prevent children from manipulating them. In addition, these parts prevent them from being damaged over time or from being damaged in the event of theft. The Cover with viewer for mechanical or electronic card switch in graphite of the Simon 27 Play series consists of two modules, suitable for surface and flush mounting Available in three different finishes, so it is recommended to choose a frame with the same colour as the selected cover, they are made of materials with thermoplastic components that allows a high degree of resistance to all kinds of impacts or knocks, to deterioration over time and oxidation. With universal dimensions of 45x45 mm, it stands out for its design of purely neutral lines that matches all types of modern environments.
