

Water Like Wine

"Water Like Wine" is the name of the project with which Filette aims to give water, the most precious good for humanity and the whole planet, the same value and dignity the market devotes to wine and champagne. Bottled mineral water is following the same evolutionary path as wine, and the rise of the hydrosommelier figures, professionals capable of appreciating water in all its aspects, is proof of this.

Quality, purity, excellence.

This is our mantra, our objective and philosophy, which guides us in every choice. Every day we strive to give water, one of the most precious elements for man, the importance and value it deserves, transforming the simple gesture of drinking into a moment of reflection and discovery. A true culture of good drinking, which aims to make water follow the same ennoblement and the same evolutionary stages of the wine world. A path that continually changes, in which innovation does not aim exclusively at a product that is always able to satisfy the most demanding palates, but also at choices that aim to respect and ennoble the environment and the planet.

SKU	PRODUCT DESCRIPTION	PACK SIZE
1112796	WATER NATURAL GLASS 750ML	12/750 ML CS
1112792	WATER SPARKLING GLASS 750ML	12/750 ML CS
