## Why use Organic Cotton?

Organic Cotton is grown using only natural fertilisers and non genetically modified seeds

→

Waste water is treated so no contamination is released into the environment

→

Finishing leaves no dye, bleach or chemical residue

### Ensures:

- Farmers can reuse seeds and grow mixed crops helping feed their families and reduce financial risk
- Workers in the supply chain are not exposed to any harmful chemicals or residues
- All factories are routinely inspected to ensure no forced or child labour

### Reduces:

- Water waste: Organic farming methods maintain soil quality meaning rain water is held in the soil so less water is needed
- The use of chemicals deemed harmful by the World Trade Organisation

### Did you know?

*Traditional cotton production uses 10% of world pesticides and 25% of world insecticides, strong chemical agents that pollute the ecosystem.*
