Display emotions, make your robot talk and create new personalities.

Discover the Expansion kit EMOTE, which allows Otto the robot to mirror human interactions and reactions and perform a range of emotions.

Give your robot a soul and turn him into an engaging learning companion.

Main features

- Swap to an OLED screen to display faces, data, messages, numbers, games, and more
- Color LED matrix for RGB retro pixel graphics, emojis, mouths, light effects, and scrolling text
- MP3 player with integrated buttons and a switch for direct control of voice and music files

Give your robot personality

**Show emotions and express yourself**
