

Explore multiple tactile interactions with the robot.

Expand your robot's capabilities with the Expansion kit INTERACT. Add tactile reactions through a series of input modules that allow for a myriad of playful activities.

Turn your robot into an interactive playmate that responds to its environment and promotes STEM+A learning

Main features

- Push the button for quick commands
- Adjust brightness, speed levels, and more with the rotational knob
- Step rotation input to precisely control multiple variables and codes
- Measures the proper acceleration of your robot to create diverse reactions and fun games

Interact with Otto

Control your robot with modules

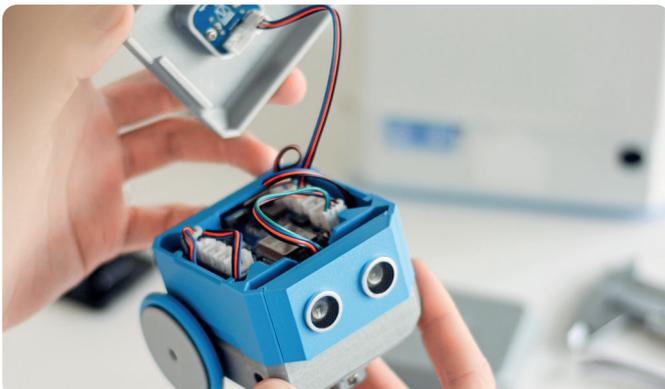

New ways to interact

Quick swap modules
