ECOSORT™ RECYCLING SYSTEM

The EcoSort™ Recycling System has been designed to offer customers a unique and flexible solution for the source separation of waste materials. The contemporary and sleek design ensures that EcoSort™ sits comfortably in any office environment, whilst the narrow footprint makes efficient use of limited space. The range consists of two different sized bodies; EcoSort™ Midi and Maxi. Five different lid types are also available; paper aperture, bottle and can aperture, a grab lid for general waste, a swing lid and a secure lid for confidential waste. EcoSort™ lids are available in eight different WRAP approved colours enabling the collection of a variety of material streams and are supplied with WRAP labelling. The EcoSort™ Recycling System has the added benefit of being designed and manufactured in the UK, which not only ensures short lead times, but minimises freight emissions.

Source separation

Ideal for pre-sorting collected waste.

Two container sizes available;

Maxi and Midi.

Strong ergonomic handles

enables easy lifting and emptying of the containers.

Matching body and lid graphics

supplied in official WRAP colours.

Five lid types;

paper recycling slot, bottle/can aperture, a general waste grab lid, a swing lid and a secure lid.

Added strength

Manufactured from tough, heavy duty polymers.

Large surface areas

suitable for application of custom graphics.

Official WRAP colours

EcoSort™ lids are available in eight different colours.

Narrow footprint

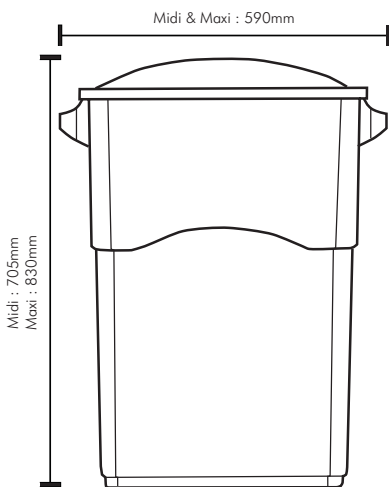

makes efficient use of limited space. Less than 0.2 m².
