-

DESCRIPTION

The BUNKER wall cabinet is a versatile component of our innovative modular storage range. It can function as a standalone storage cabinet or seamlessly integrated into the BUNKER modular storage system, offering a choice of many smart modular options.

Our wall cabinet is made from high-quality steel and features a single lift-up door for effortless access. It is also protected against scratches and wear with a sleek matt black industrial powder coating.

Thanks to its robust gas struts, the cabinet, which has a durable aluminium handle, operates smoothly and quietly. For added security, it comes with an integral lock and two keys.

Delivered fully assembled, along with all necessary fittings for easy installation, the wall cabinet can be mounted directly to a wall or combined with a floor cabinet fitted with a back panel and side wall bracket to optimise storage space.

Explore the range of BUNKER stockists online and elevate your garage or workshop today.
