DESCRIPTION

This robust BUNKER van storage box is designed to protect your tools from theft, whether on-site or in your vehicle. Its security features provide peace of mind, allowing you to work confidently while safeguarding your livelihood. Constructed from heavy-duty steel, the BUNKER T1 is designed to fend off thieves. A key feature of this box is the patented anti-theft screws which secure the front lid handle, designed to break if forced, preventing leverage to break in. The internal hinge design also protects against tampering, and the steel cross bracing, along with a reinforced lid, prevents the box from being pried open. Additionally, this lockable van box can be securely attached to your vehicle's floor and is fitted with a tough security lock (supplied with two keys). There is also a discreet built-in holder for an AirTag, allowing you to track your box if it goes missing. For ease of transport, it features a carry handle on both sides. The BUNKER T1 has been rigorously tested and certified as Silver by Sold Secure, the UK's leading authority on security products and Secured by Design, the official police security initiative. It comes with all the necessary fixings for installation in your vehicle. You can also complement it with additional BUNKER van vault boxes to customise your vehicle storage to your specific needs.

AirTag holder fits most Bluetooth trackable devices. AirTag not included.
