DESCRIPTION

The BUNKER T2 Outback is a heavy-duty van tool box designed to provide secure, reliable storage for your tools, whether you're working from your vehicle or on site. Built from rigid steel with a durable phosphate coating, this robust BUNKER T2 tool box is designed to help protect your tools from theft while keeping them organised and accessible.

The BUNKER T2 Outback combines tough construction with a range of security features to provide dependable, secure van storage. A key feature of this box is the patented anti-theft screws which secure the front lid handle, designed to break if forced, preventing leverage to break in. Additionally, a reinforced lid, internal hinge, and steel cross-bracing help protect against tampering and forced entry, while the high-performance disc locks provide an additional layer of security. The box can also be securely fixed to your vehicle's floor using the supplied vehicle-fixing points.

Designed with accessibility in mind, the wide drop-front door provides unobstructed access to your tools, while the smooth gas strut mechanism makes opening and closing straightforward. Adjustable feet help provide a stable installation, and carry handles on both sides make the BUNKER T2 Outback van tool box easier to move when required.

For added peace of mind, the BUNKER T2 Outback includes a discreet built-in AirTag holder, allowing you to add a compatible tracker to your storage box. The T2 has also been rigorously tested and certified as Silver by Sold Secure, the UK's leading authority on security products, as well as Secured by Design, the official police security initiative.

Whether you're looking for a secure van tool box to protect your equipment overnight or dependable storage for tools while working on site, the BUNKER T2 Outback is built to provide robust security and practical access wherever the job takes you.

All necessary fixings for installation in your vehicle are included, and all BUNKER storage products come with a 12-month warranty, which is extended to 10 years upon registration.
