The polishing system of the future!

bit.ly/RqowTg
Watch video!

- Covers the entire polishing process, from fine sanding at the start to remove scratches, to a high gloss finish, due to particles that become smaller in size during the polishing process
- Does not create polishing dust that is left over after polishing
- Is a non-solvent based one step polishing compound
- Does not contain any kind of wax
- One polishing material for all kind of paint surfaces
- One step process, you only need one sponge and one polishing material
- Best results in combination with the Hamach sanding pads line (medium & hard)
- Saves time and no polishing failures anymore
- Produces the best finish, also on corroded surfaces
- Minimum waste of material
