- Resist both water/ or solvent based degreasers
- Adjustable spraymist

Packaging information

Per piece

Technical information

- Content: 1000 ml
- Temperature resistance: Liquids up to 30°C

Frequently Asked Questions

> **How do I prepare properly before usage?**

Check before use that all parts are undamaged and working correctly. Unscrew the pump from the tank. Fill the canister with liquid up to the "max" level. Screw the pump head on and tighten it so that the canister is sealed and airtight (if it is not, it will be impossible for pressure to build up).

> **How do I use the Colad Pump Spray Bottle?**

Pump air into the tank using the piston (around 20 to 30 pump movements). Important: It is not possible to generate more pressure in the tank than specified. The sprayers are fitted with an automatic relief valve. Press the spray button to spray. By turning the spray nut, you can set the desired spray pattern (mist jet). If liquid continues to drip out of the nozzle when releasing the spray button, there is still air in the sprayer. Spray upwards at an incline for around two to three seconds to enable the air to escape.

> **What kind of liquids can I use with the Colad Pump Spray Set?**

Please check out the Resistancy list of chemical materials in order to choose the right type of Colad Pump Spray for your paint job.
