

Colad Snap Lids® 350 ml

50 pieces of Snap Lids with built-in strainer of one micron size in a handy dispenser box. Suitable for the 350 ml Colad Mixing Cup. The dispenser box is easy to mount at working height with the Colad Snap Lid Wall Mount art.nr. 937010. Available with 4 different micron filters.

Combine your Colad 350 ml Mixing Cup with this 350 ml Snap Lid to create your paint application system. Colad Snap Lid paint application system turns your mixing cup into a paint cup, making painting as simple as Mix, Snap & Go! With three different sizes of paint cups and 4 different micron built-in filters Snap Lid is the paint application system for every paint job.

The fastest paint application system for all types of paint. Colad Snap Lid system helps you save time, effort and money and is easy to use, just Mix, Snap and Go! Speed up your paint process by using the mixing cup as a paint cup, thanks to the Snap Lids, and use fewer materials doing so. The built-in strainer, available in 90, 130, 190 and 280 microns, offers a built-in paint straining solution for all types of paint.

Benefits of Colad Snap Lid system:

- Fastest system; save time and money by using the mixing cup as a paint cup
- Easy-to-use; complete system with attuned components
- For all types of paint; four filters available for clear coatings, waterborne coatings, conventional based coatings, and primers.
- Unique valve system; prevents a vacuum and guarantees a stable paint flow
- Reinforced lid; for fast and easy closure and leak prevention
- Secure and tight thread; for a stable and watertight connection to the spray gun
- For all types of spray guns; matching adapter for almost all types of spray guns.

Frequently Asked Questions

> Where can I buy Colad Snap Lid System?

You can buy Colad Snap Lid System with your preferred Colad dealer. If you don't have a dealer selling the product, we can help you find a dealer who can offer you our paint application system. If you need any help to find a dealer, please contact us through the contact form.

> How can I find the right adapter for Colad Snap Lid System?

We have created an adapter selector that helps you find the right adapter based on your spray gun brand and type. You can find this adapter tool linked at the bottom of this document. Can't find the right adapter for your spray gun? Contact us and we'll help you find the adapter you need.

> What micron filter do I need to use?

Colad Snap Lid system is designed as a paint application system suitable for all types of paint. We'd advice to check with your paint supplier which micron to use for a specific type of paint. In general the 90 micron filter can be used for clear coat, the 130 micron for waterbased base and/or clear coat, the 190 micron for conventional base coat and the 280 micron for primer. However this might vary depending several conditions such as the recommendation from the paint manufacturer.

> How can I achieve optimum output flow?

To get the best output from Colad Snap Lid System you should prevent too much air remaining between your spray gun and the built-in filter. This can be done by slowly tilting the gun after attaching the paint cup, in order to let the air out and the paint in, or by tilting the gun back and forward and release a bit of output. Once the transparent part of the lid between the filter and the spray gun is over 2/3 filled with paint, you will achieve the best paint flow.

> What is the best way to assemble the lid on the cup?

For a visualization of the recommended way to place the lid on the cup you can watch our Colad Snap Lid System user manual' video on YouTube. We recommend to attach the lid from one side, and slowly use both hands around both sides of the lid towards the other side. The lids are made to fit the cup perfectly, therefore you don't have to apply excessive force to attach the lid properly.
