

Colad Industrial Nitrile Gloves

Recommended when you are in continuous contact with solvents. Resistant to most chemicals. Excellent grip and molded to the contours of the hand. Highly comfortable and suitable for multiple use. The gloves are fitted with a soft, anti-allergic liner that prevents allergies and strengthens the gloves. Before use, check glove for any damage. Do not use a damaged glove.

- Protect against solvents, acids, oil, grease and lubricants
- Good protection/flexibility ratio
- Molded to the contours of the hand with bended fingers, preformed palm and non-skid profile

Cleaning instruction: Wash the gloves thoroughly with mild soap or a non-abrasive, low-pH detergent. Use lukewarm water and ensure all areas, including between fingers and the palm, are cleaned. Gently scrub the gloves with a soft brush or cloth to remove stubborn residues. After washing, air dry the gloves thoroughly in a clean, well-ventilated area before storing under the described conditions.

Storage: Storage procedures are the main factor in determining glove shelf life. Gloves should be kept in their packaging protected from sunlight, artificial light, humidity and stored at temperatures between 5°C - 35°C. Storage under these conditions should provide shelf life of 5 years.

Article number: 533000x

Description: Industrial Nitrile Gloves

Art no.	Variant	EAN
5330004	M	8714247036808
5330000	L	8714247002063
5330002	XL	8714247002087

Packaging information

Per pair in a plastic bag with size indication. 12 pairs in a carton.

Technical information

- Colour: Green
- Packaging: One pair in a plastic bag with size indication
- Packaging unit: 12 pairs in a transport carton box
- Material: Nitrile
- Length: 330 mm
- Weight: 90 g
- Design: Non-slip fingers
- Available sizes: L and XL
- Notified body number: CE 2777
- Ongoing conformity: CE 0598

Frequently Asked Questions

> **What gloves do I use for what process?**

Colad offers a complete range of gloves, suitable for all steps in the paint process. We categorize three types of gloves for different steps in the paint process:

Preparation: For disassembly, assembly and preparation we provide you with the Colad Polyester Preparation Gloves. Colad Preparation Gloves offers protection against mechanical risks. The EN 388:2016+A1:2018 test indicates the abrasion, blade cut, tear and puncture resistance.

Painting: Colad disposable nitrile gloves are especially developed for use during the paint process, offering comfort and protection for the user and protection against paint contamination.

Cleaning: For cleaning with various chemicals, Colad advises to use their Industrial Nitrile or Neoprene gloves. These Gloves are fitted with a soft, anti-allergic liner that prevents allergies and strengthens the gloves. Both Colad gloves are tested according to EN ISO 374-1-:2016+A1:2018/Type A (chemical resistance), EN ISO 374-4:2019 (degradation) and EN ISO 374-5:2016 (bacteria and virus) which means they are leak-proof, protect against mechanical risks and chemical dipping (full contact).

> **Are there care guidelines for this product?**

Storage procedures are the main factor in determining glove shelf life. Gloves should be kept in their packaging protected from sunlight, artificial light, humidity and stored at temperatures between 5°C - 35°C. Storage under these conditions should provide shelf life of 5 years.

> **How do I clean these gloves?**

Wash the gloves thoroughly with mild soap or a non-abrasive, low-pH detergent. Use lukewarm water and ensure all areas, including between fingers and the palm, are cleaned. Gently scrub the gloves with a soft brush or cloth to remove stubborn residues. After washing, air dry the gloves thoroughly in a clean, well-ventilated area before storing under the described conditions.

> **EU 2016/425**

Personal Protective Equipment (PPE) CAT III according to European regulation (EU) 2016/425. PPE of complex design protects against risks that cause irreversible damage to health. In accordance with with EN ISO 21420:2020 Protective gloves: General requirements and test methods.
