

MACO C-TS

French Door Locks

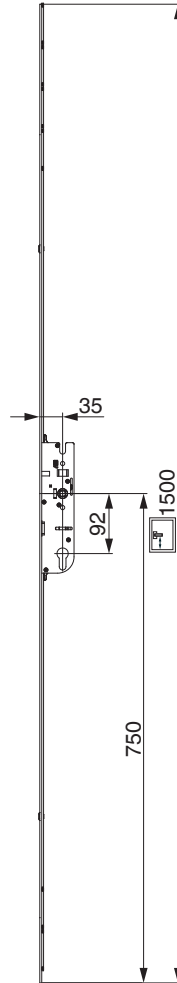

- Master and slave door locks
- Lever or split spindle operation
- High security

The highly secure C-TS locking system by MACO is available to suit French door sets. The locking comprises of a master door lock which features the same locking points as the standard single residential door lock. It is more compact to suit the smaller door height of French doors while also offering the ability to achieve PAS 24.

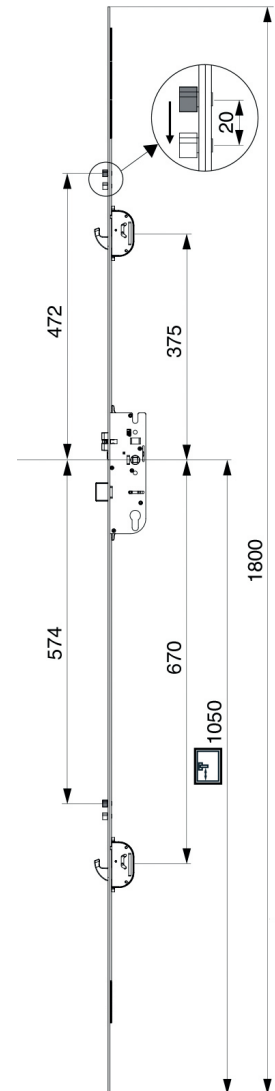

The Slave door lock includes a C-TS centre section to allow for lever handle operation. Shootbolts can be fitted to the top and bottom to secure the slave sash in place.

All MACO products are supplied with the Tricoat Plus coating as standard providing 1,000 salt spray testing to BS EN 1670.
