## DAD Parcel Dropbox

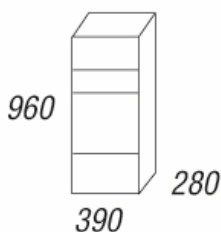

The most frustrating issue facing many online shoppers today is that they are never at home to receive their parcels which won't fit through their letterplate or into their postbox. Therefore, requiring a roundtrip to the local sorting office to queue to collect your partner's latest purchase or worse still having your goods delivered to your place of work!

The designer led DAD Parcel Dropbox is the solution that we have all been looking for. A large receptacle for all your mail, newspapers and small packages. Secured within a galvanized steel box and concreted into the ground with a patented base plate and securely locked with a 5 pin cylinder. The Parcel Flap for deliveries is 115mm H x 300mm W x 300mm D.

### DAD Parcel Dropbox

#### DAD Parcel Dropbox
