

ANTI-TAMPER RESTRICTOR COVER

The Cardea Anti-Tamper Window Restrictor cover is designed for use on existing first-generation window restrictors where the lock can be picked - therefore not meeting HSE Guidelines.

- The Anti-Tamper cover is designed to fit over existing window restrictors to cover the existing lock and prevent tampering.
- Anti-Tamper screws to prevent the restrictor from being easily compromised.

APPLICATION

- Suitable for first generation window restrictors where there is risk of the lock being tampered with.

SPECIFICATION

- Supplied with anti-tamper screws preventing the restrictor from being removed without the use of a drill or specific tools.
- Made from Zinc Alloy.
- Includes a plastic screw cover.
