

INTERFLON

POWER WIPES

Versatile multi-purpose cleaning wipes with F-Active technology

Powerful cleaning towels saturated with a heavy duty industrial cleaning solution. Convenient and easy to use, for the cleaning of dirt and grease from tools, work areas, machine parts and equipment. Excellent for use when working at an off site location.

Interflon Power Wipes effortlessly remove common and persistent dirt such as grease, oil, printing ink, graffiti, tar, brake fluid, soot, glue, graphite, resin and many other persistent sources of dirt. The high absorbency capacity of the towels ensure that dirt is thoroughly absorbed and retained.

Key Advantages:

- Large heavy duty towels
- Does not “fluff” and leaves little or no residue
- Powerful cleaning properties
- Pleasant odour
- Extremely high absorbency capacity
- Easy and cost effective to use

Applications:

- Tools
- Machine Parts
- Construction Hard Hats
- Cutting Cables
- Conveyor Systems
- Doors and Window Sills
- Control Panels

INTERFLON POWER WIPES

Versatile multi-purpose cleaning wipes with F-Active technology

Interflon Power Wipes are ideal for cleaning and removing dirt and other contaminants from machinery, workplaces, work areas and many more applications. Packaged in a handy container which preserves the towels ensuring that the cleaning solution is retained and towels remain moist.

Distinctive Properties:

- Remains moist for several hours for repeated use
- Ideal for use in on-site maintenance
- Suitable for use in the food industry
- Comes in a re-sealable container, ensuring the towels remain moist

Practical example:

Removal of graffiti from traffic signs

The standard cleaning method using a paint solvent to remove graffiti from traffic signs damages the reflective film.

Our solution

Interflon Power Wipes

Result:

Interflon Power Wipes easily remove the graffiti. In case of thick layers of paint, squeeze some fluid from the Power Wipes so as to dissolve the graffiti. Traffic signs are clean without damaging their reflective layer.

A cost saving of £75 per traffic sign
