

Sash Travel Restrictors

Features

- Convenient, simple and cost effective method to restrict the opening on sliding sash windows.
- Offers enhanced safety and security for sash windows
- Suitable for PVCu and timber sliding windows
- Non-handed for ease of application
- Routed into the sash, restrictor sits discreetly on the window

The spring loaded bolt is lockable

- Side and face fix version available
- Key lockable
- Available in White, Gold, Chrome and Satin Chrome finishes

Securing the sash

The robust sash travel restrictor range has been designed with safety in mind. Positioned on the sash the restrictor limits the opening of the sash.

Suitable for use on PVCu or Timber windows, the travel restrictor is ideal as a child safety device, preventing the travel of the sash beyond as designated position. A key is then used to simple close the bolt and allow the sash to move freely.

Available in a choice of two fixing options - side fix; and a range of finishes including White, Gold, Chrome and Satin Chrome.

It is recommended that a restrictor is fitted to both sides of the sash.
