

How **UNION's DoorSense** helps to prevent the spread of infection

Experience a safer
and more open world

REDUCING TOUCHPOINTS

HOLDS DOORS OPEN

Once set in the open position, people can move through the building without needing to touch the door

FOOT OPERATED

For minimum hand contact with the unit

FIT TO EXISTING FIRE DOORS

Can be installed on a fire door already fitted with a closer, as UNION's DoorSense releases the door when the fire alarm is activated

SOCIAL DISTANCING

ONE-PERSON INSTALLATION

Allows installer to comply with social distancing requirements for increased protection

EASY TO INSTALL

Requires no wiring or specialist skills to install, so can be installed by a competent person already on site

The safe and legal way to hold open a fire door and reduce touchpoints
