Yale® smart Living

Keyfree Connected Smart Lock

—

The Yale Keyfree Connected smart lock gives you freedom to secure your home without the need for a key. Simple to use, you now have complete control on how you unlock your door.

Convenience.

There's no need to worry if your children arrive home early, or if you're stuck at work with friends on your doorstep. You control who and when people have access to your home. For example, you can set a PIN code that works for 24 hours for a family member or your cleaning person.

Simple to use.

You choose how you want to open your door. PIN code, remote fob and even from your smartphone when connected to a smart home system. It is also easy to add and remove users if you need to.

Security as standard.

Feeling safe and secure is a must for any homeowner. In addition to a tamper alarm and incorrect PIN code feature the smart lock is approved by the Police Secured by Design scheme.
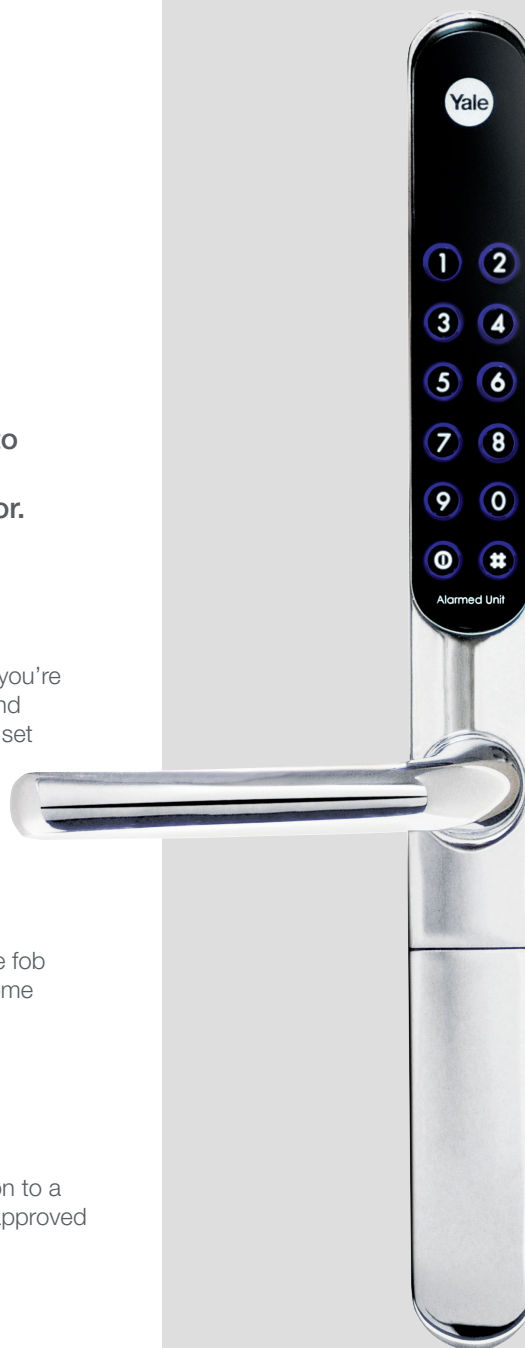

Always On.

Don't worry if the electricity goes down as the smart lock is powered by 4 AA batteries. It will even warn you when the batteries are running low.

Connectivity.

Complete your smart home system. The Keyfree Connected smart lock can connect to leading smart home systems when the appropriate module is fitted. It also connects to the Yale SmartPhone Alarm and CCTV systems when you use the Yale module.

Specification

—

- Front body measures 35mm (W) x 355mm (H) x 22mm (D)
- Operating temperature -15ºC to 55ºC
