

# DEBAR HANDLES

## DEBAR verso Classic bi-fold door handle

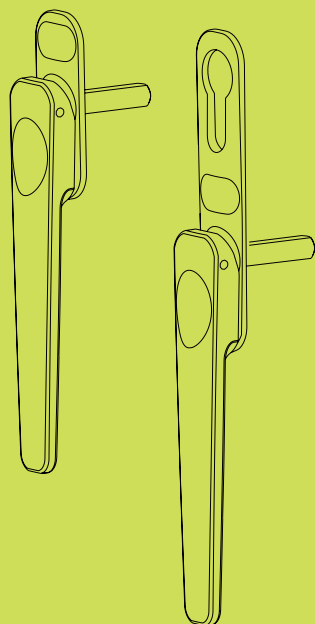

### Main Features

- Sleek classic look with aesthetic appeal
- 6 stock finishes to provide end user discerning choice
- Aesthetically pleasing cylinder locking option, with escutcheon part of handle arrangement
- Screws not visible when handle in closed position
- Strong & robust enough to pull heavy doors without the need for unsightly additional grab handles
- Finishes match to the Protec magnetic door holder and Debar range of Hoppe lever/lever handles, offering complete colour coordination for end users
- Handle tilts 40mm for a better grip
- Handle without escutcheon fits standard Euro window gearing
- Stock finishes - White Gloss, Black Matt, Grey Matt, Brushed Satin Chrome, Polished Chrome and Gold Polished Chrome, Raw/Unfinished
- Alternative colours by request and special order

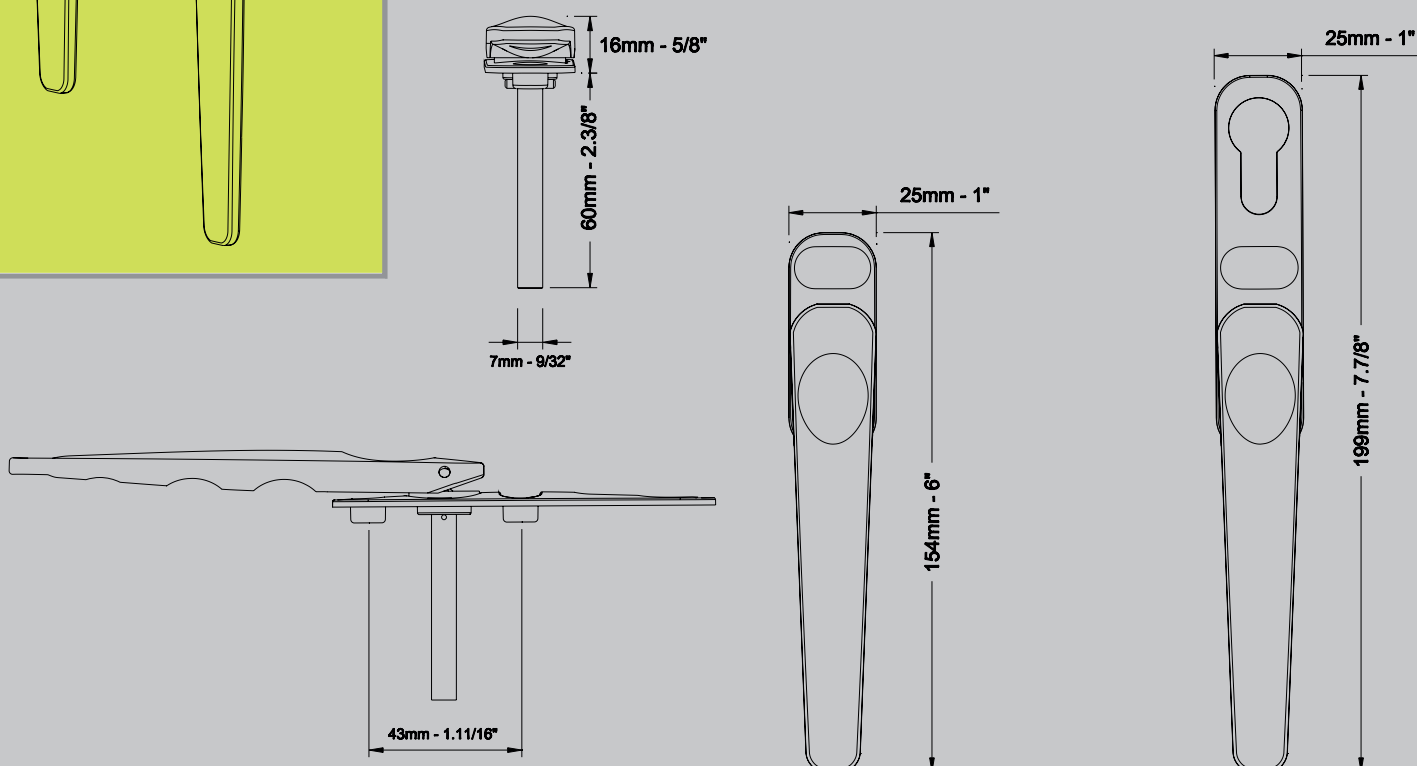

# DEBAR<sup>verso</sup>

## Classic bi-fold door handle

Verso handles have been engineered for in built strength to withstand the force of pulling heavy panels at the same time as operating shoot bolts. You can tell by the weight of the verso handle, that strength is a priority over cost. Significant engineering expertise went in to defining the length of handle, the hand grip and tilt to ensure the end users finds it easier to use whilst carrying out the dual function of pulling in and turning to lock.

We have also paid attention to design and aesthetics, resulting in a pleasing design and ensuring that the escutcheon forms part of the handle instead of being a separate part which would detract from the visual aesthetics.

## DEBAR<sup>robus</sup>

Locking solutions for bi-fold doors

Verso handles can work in conjunction with our Debar Robus/lock or alternative gearboxes/locks with 43mm 1.11/16" centre screw fixings. A separate information sheet for Debar Robus/lock is available
