

BOSE- AMM Suspension Bracket- Black

DESCRIPTION

The AMM Suspension Bracket is designed for use with Bose AMM108 or the Bose AMM112 loudspeaker. The Suspension Bracket is designed to provide single point suspension for the loudspeakers and mounts along the center of gravity so the loudspeaker hangs level. The bracket has multiple single-point suspension attachment points to allow incremental angle adjustment from 40 degrees (AMM108) or 35 degrees (AMM112) of downtilt and ranging to 30 degrees (AMM108) or 25 degrees (AMM112) of uptilt. The bracket fits the M10 threaded attachment points on the top of loudspeaker, is shipped with required fasteners for attaching the bracket to the loudspeaker and is not designed for permanent outdoor use.

TECHNICAL CHARACTERISTICS

Brand : BOSE
Part number : 843344-0010
Compatibility : AMM108, AMM112, AMM108, AMM112
Placement : Ceiling
Tilt adjustment : Y
Tilt angle range : 0 - 40°
Width : 329 mm
