

Dacomex Chassis locking system with security PC screw

DESCRIPTION

This chassis lock is designed to secure a device lacking a Kensington anchor.

The PC screw can be fastened on an existing threaded hole. In addition, you can pass the cable through the slot, preventing anyone to unfasten the screw

The double loop noose is practical to attach the device to your desk.

Product benefits:

- Steel cable : 0.6 mm x 1.80 meter
- Includes a keylock with 2 keys
- Optional security PC screw (PN915103)
