

DACOMEX Left-handed vertical mouse V150-UG USB black

DESCRIPTION

Featherweight and reduced size!

The vertical mouse avoids forearm twisting for better comfort and good health.

The vertical mouse allows you to adopt a neutral vertical posture which generally avoids forward-arm from twisting.

Many users, including doctors recommend the use of vertical mice for superior comfort and relief from wrist pain.

Comfortable and easy to use,

The shape is carefully sculpted for uncompromising comfort and its 5 easy-to-reach buttons allow full use without any finger contortion.

Next/previous page buttons are conveniently placed under the thumb for intuitive use.

Its featherweight is a significant plus.
