

## DESCRIPTION

### **Use the power of your voice**

SpeechExec Basic Dictation and Transcription Software links authors and transcriptionists. It facilitates communication, the setup of individual workflow settings and organizational flexibility to help save time and resources. Transcriptionists can playback and conveniently transcribe recorder files using a foot control.

### **Workflow management and automation for enhanced productivity**

Easily monitor and manage the workflow between authors and transcriptionists. Recordings and the resulting written documents are automatically routed to the appropriate person for quicker turnaround times.

### **Worklist for easy work monitoring and tracking**

Worklists help both authors and transcriptionists monitor their work statuses. They save time used for unnecessary status update communication. Files can be organized into sub folders, assigned specific properties and comments and marked as urgent to help organize and prioritize tasks.

### **Optional SpeechLive connection available for even greater mobility**

Philips SpeechLive cloud dictation workflow solution gives users constant file access via browser for greater flexibility and mobility. With SpeechLive, authors can dictate with their smartphone from anywhere and send dictations directly to their SpeechExec software. It also features a transcription service, where trained professionals quickly type up recordings for the author.

### **Flexible licensing to access SpeechExec from anywhere, including at home**

Licenses are now assigned to individual users, not to individual PCs, giving you the freedom to work from your desktop at work or from a laptop off-site. This also allows you to easily reactivate a license in case of a hardware failure.

### **Automated file download for quick and convenient job routing**

SpeechExec Basic allows authors to automatically download all their dictations from their voice recorder straight into the software and route to the appropriate destination via their local network, FTP server, SpeechLive or email.

### **Transcription player with foot control support for hands-free playback control**

The software comes with a conveniently integrated transcription player with pause, fast forward and rewind options. Together with the configurable Philips foot control it allows for comfortable and quick transcription. Predefined templates can be used, so documents are automatically created with the appropriate header and footer, saving you even more time.

## TECHNICAL CHARACTERISTICS

Brand : PHILIPS

Part number : LFH4722/00

Compatible operating systems : Windows 11 Pro, Windows 10 Pro/Enterprise (64 bit)

Language version : Czech, Danish, German, Dutch, English, Spanish, Finnish, French, Norwegian, Swedish

License type : Full

Media types supported : .dss, .ds2, .wav, .mp3, .wma

Minimum processor : Intel dual core or equivalent AMD processor, 1 GHz or faster processor

Minimum RAM : 4000 MB

Minimum storage drive space : 100 MB

Number of languages : 10

Number of years : 2 year(s)

Software type : Subscription
