

## DESCRIPTION

To power the next generation of laptops, we have developed this Volt II USB-C PD GaN Wallcharger that supports up to 140W of power. This is made possible thanks to the implementation of PD 3.1, with Extended Power Range (EPR) support. Don't let the small design fool you – these chargers pack a powerful punch!

### Travel-sized compact design

The revolutionary small size of the Volt II chargers is made possible thanks to GaN chipset innovations. These technologies enable the chargers to safely and efficiently handle more power in a smaller size. This allows them to be up to 70% smaller than non-GaN chargers!

### Multi-port charging

This charger has been designed with multi-port charging in mind. It features two powerful USB-C PD outputs, as well as a USB-A Quick Charge 3.0 port for increased versatility. This means you can charge 3 products at the same time.

## TECHNICAL CHARACTERISTICS

Brand : XTORM

Part number : XAT140

Charger compatibility : Universal

Charger type : Indoor

Depth : 120 mm

Fast charging : Y

Fast charging technology : Quick Charge 3.0

Height : 80 mm

Housing material : Acrylonitrile butadiene styrene (ABS)

Maximum power : 140 W

Port 1 output power : 140 W

Port 2 output power : 100 W

Port 3 output power : 22.5 W

Power source type : AC

Product colour : White

Quantity per pack : 1 pc(s)

USB 2:0 ports quantity : 1

USB Type-C ports quantity : 2

Width : 30 mm
