

DACOMEX Keylock system- Master key

DESCRIPTION

Notebook security keyed lock for 1 device with "PASSE" option

With easy and quick lock with "Push-to-Lock" system that allows keyless entry, this metal security cable is composed of a braid of 6 cemented steel wires to guarantee good resistance to aggression while maintaining optimal flexibility and keeping the mobility of the device secure.

The attachment claw is designed for 7 x 3 mm K-Lock type slots.

The lock has a double identical keys but each of the locks are completely different.

This version of PASSE compliant anti-theft is a model with special lock allowing the use of an optional universal key, ideal for park managers.

Another additional option compliant with PASSE option, is the secure loop Ref. 915070 which uses the "Push-to-Lock" system and add a point of attachment to the anti-theft cable Ref. 915010 giving for example the possibility to secure the seconfaire screen to the laptop. The optional key PASSE for also compliant with the loop ref. 915070.

- K-Lock notch key lock 7 x 3 mm (Kensington equiv.)
- Attaches to the usual laptop, screen or peripheral docking slot
- 200 cm braided steel cable
- Delivered with 2 identical keys
- Optional universal key "PASSE": ref 915031
- Additional anchoring loop: ref 915070
