

## MAINS VOLTAGE DETECTOR AND SWITCH

### DESCRIPTION

The PowerEgg is designed to detect and switch on/off your mains voltage.

The controlling circuit and the controlled circuit are both electrically insulated.

The PowerEgg can be coupled with a Poseidon 3268 if you need to be alerted by e-mail or SNMP Trap in case of a power outage.

Can be connected directly to a dry contact for access control or to a smoke detector.

Specifications:

- Supports 110 / 230 V 8 amp
- Equipped with two IEC connectors :C14 plug at the input and C13 plug at the output
- Includes two functions in a single device: Mains voltage detection at the input and Voltage control at the output

### TECHNICAL CHARACTERISTICS

Brand : HWGROUP

Part number : POWEREGG2
