

DESCRIPTION

The vertical mouse adapts to your natural position, so that your forearm does not get twisted. It reduces the pain and prevents repetitive strain injury.

Many users, including doctors, recommend the use of vertical mice, for optimum working comfort and less wrist and forearm strain. The shape of the vertical mouse provides optimum comfort of use. The 5 buttons are easy to reach so that your fingers are perfectly placed in a natural posture at all times. The rims on the base prevent the frictions of your little finger on the desktop.

Moreover, the built-in wrist rest prevents any friction of the hand on the desktop, reducing significantly the strain on your hand, wrist and arm.

Product benefits:

- Comfortable and easy to use
- Rims preventing the friction of the hand and fingers on the desk
- Built-in wrist rest

Main features:

- Optical sensor
- 5 buttons including a wheel
- USB interface
- Compatible with Windows OS
- 1600 dpi-resolution

TECHNICAL CHARACTERISTICS

Brand : DACOMEX

Part number : V200-U-B

Connection :

Interface : USB

Wireless : No

Connection type : Wired
Ergonomics :
Type : Vertical
Number of buttons : 5
Wheel type : Basic
Ambidextrous : No
For left-handed : No
Applications : Office
Colour : Black
Sensor :
Sensor type : Optical
Optical resolution (DPI) : 1600
Dimensions :
Length (mm) : 127
Width (mm) : 75
Height (mm) : 65
Cable length (m) : 1.6
