

DESCRIPTION

The AMM112 U-bracket allows for versatile mounting of a single AMM112 loudspeaker with ample rotation to accommodate various pitch angles. The structural rigidity of the bracket allows either two-point attachment to flat surfaces such as walls or ceilings, or single-point attachment via the center mounting hole to secondary support structures such as third-party lighting-pole mounting kits or truss. The bracket fits the M10 x 20 mm threaded inserts on the side of the AMM112 loudspeaker, is shipped with required fasteners for attaching the U-Bracket to the loudspeaker and is not intended for permanent outdoor installation.

TECHNICAL CHARACTERISTICS

Brand : BOSE
Part number : 843364-0010
Compatibility : AMM112
Depth : 390 mm
Placement : Ceiling, Wall
Product colour : Black
Quantity per box : 1 pc(s)
Tilt adjustment : Y
Tilt angle range : 60 - 110°
Width : 472 mm
