

Dual rail 19"LCD 16PORT kvm VGA/PS2-USB

DESCRIPTION

The DEXLAN dual rail KVM console has two independent drawers:

The first drawer is equipped with a French keyboard- which can be replaced by a Qwerty as an option -and a keypad.

The second drawer is equipped with a TFT-LCD with a 19" diagonal.

The DEXLAN LCD console is the same height as a network switch (1U) and saves some valuable space in the network cabinet.

The KVM switch controls up to 16 computers connected over combo cables.

An additional Keyboard/ monitor/ mouse set can be connected to the 2 rear ports of the KVM.

An IP module can be added for remote control of the 16 ports via local network and Internet.
