

BOSE SubMatch Cable

DESCRIPTION

SubMatch connectivity is a proprietary technology invented by Bose to connect the Sub1 or Sub2 powered bass module to the L1 Pro32 portable line array or to daisy-chain an additional Sub1 or Sub2 to the system. A SubMatch cable is included with each L1 Pro32 line array and delivers both power and audio from your L1 Pro32 to your Sub1 or Sub2 subwoofer, making setup easier and allowing the systems crossover and EQ to automatically calibrate for optimal sound. And if you want to connect a second Sub1 or Sub2 to your L1 Pro32 system, all you need is a second SubMatch cable.

TECHNICAL CHARACTERISTICS

Brand : BOSE

Part number : 857172-0110

Connector 1 form factor : Straight

Connector 1 gender : Male

Connector 2 form factor : Straight

Connector 2 gender : Female

Product colour : Black

Quantity per pack : 1 pc(s)
