

DESCRIPTION

This industrial 5-port 10/100/1000Mbps Ethernet switch can be installed in a workshop, warehouse, and any production unit. The switch is IP-30 rated and can be operated in extreme temperatures (-40°C to +75°C). Compliant with the Class I Division 2 classification, it can be operated in the most difficult environments.

Specifications :

- 5 x 10/100/1000 Mbits ports
- Backplane : 10Gbps
- Jumbo Frame management : up to 9k
- Can be powered by a 6-pin redundant terminal block with alarm system
- Power : 12 to 48V DC
- Maximum power: 11 Watts
- Aluminium case, IP30-rated
- Operating temperature: -40°C to +75°C
- Can be installed on a Din Rail or by a wall plate
- Dimensions: 135x87x32mm
- Weight: 498g

TECHNICAL CHARACTERISTICS

Brand : PLANET

Part number : IGS-801T
