

Screen Protector PRIVACY 13.3" W 16:10

DESCRIPTION

For those who want to use their laptop away from prying eyes, MOBILIS® has designed privacy filters which can be adjusted to fit your IT equipment. This removable filter helps you to completely protect your personal or sensitive data on your computer screen. In fact these privacy filters use a micro-louvre technology which only allows the person in front of the screen to see the data on display. Those seated on each side of the computer can only see a black screen. This essential protection accessory means you can work with complete peace of mind in public places, on public transport, or even in an open-plan office. This privacy filter is compatible with any LCD or laptop screen. Where applicable, it also retains the screen's touch capabilities. To meet your specific needs, there are two types of installation available: for screens with bezel (installation using hanger arms) or screens without bezel (installation using adhesive strips). For the best possible usability, this privacy filter also includes a matt anti-glare finish.

Effectively protects your onscreen data from prying eyes

Only the person in front of the screen can view the displayed data (side protection)

For laptops and PCs

Compatible with most touchscreens

Easy to install - removable and adjustable

Installation kit provided

(cleaning wipes/microfibre cloth/dust protection/easy-on and easy-off)

2 attachment systems: for screens with/without bezel

Reversible: glossy finish for improved clarity; matt finish to reduce glare and the appearance of fingerprints
