

Armoire extension de batterie pour 91PS & 93PS 10 kW

DESCRIPTION

LoadStar-PS is the new family of emergency lighting AC/AC central battery systems.

The LoadStar-PS range is designed specifically for long term sustainability, offering reduced carbon footprint and running costs, without compromising on performance.

Due to the passive standby operation of the inverter, which only operates when required, the running power is kept to a minimum, in turn reducing overall running costs and maximising equipment life.

LoadStar-PS is fully compliant with EN50171, which means that you can rest assured that it can be depended upon if the worst were to happen.

TECHNICAL CHARACTERISTICS

Brand : EATON
Part number : P-105000111-002
Brand compatibility : Eaton
Depth : 750 mm
Form factor : Tower
Height : 950 mm
Number of batteries supported : 32
Package weight : 130 kg
Product colour : Black
Quantity : 1
Weight : 103 kg
Width : 159 mm
