

Graphic card VGA - USB3.0

DESCRIPTION

Add a graphic card to your computer in a snap!

This USB3.0 to VGA display adapter is compatible with Full HD 1080p resolution (800 x 600 in USB2.0). You can connect a second display, even a brand new model.

Product benefits:

- Fast and easy installation over USB3.0 interface
- Compatible with Full HD 1080p resolution in USB.30
- Low-cost solution

Main features:

- Computer connection interface: USB3.0 (down-compatible with USB2.0 but with a lower resolution)
- Display connector: 1 x VGA HD-15 connector
- Total length: 23 cm
- Maximum resolution:
1920 x 1080 in USB3.0
800 x 600 in USB2.0
- Chipset: Fresco Logic FL2000
- Compatible with Windows 7/8.x/10 OS only

Notes:

The driver is embedded to the device, and will install upon connection (no driver CD included)

The FL2000 chipset performances depend on the USB3.0 controller. For optimum compatibility, please select Intel USB3.0 xHCI host controller/ FL1100 xHCI host controller
