

BOSCH MIC-SCA-WD

DESCRIPTION

Shallow conduit adapter for a MIC-WMB, a MIC-PMB, or a MIC-SPR mount, white sand finish (RAL9010).

The MIC shallow conduit adapter (MIC-SCA) is designed to work with a wall mount bracket (MIC-WMB) and a pole mount bracket (MIC-PMB), or with a spreader plate (MIC-SPR), to allow MIC Series cameras to be mounted to flat walls or lamp posts, scaffolding, and other nonstandard mounting posts. The MIC-SCA has a single 25 mm side entry conduit fitting hole. There is not sufficient room inside to allow the camera to be mounted to it directly. (Use a MIC-DCA instead.) The MIC-SCA is machined from solid aluminum or stainless steel and provides a 4 in pitched circle diameter (PCD) mounting position for a MIC-WMB. An O-ring provides for a watertight seal to protect the composite cable.

TECHNICAL CHARACTERISTICS

Brand : BOSCH
Part number : MIC-SCA-WD
Depth : 40 mm
Product colour : White
Width : 120 mm
