

# Dexlan 8 ports vga/usb kvm switch + 8 modules CAT5 60m max

## DESCRIPTION

The DEXLAN DX-KVU5-8 switch can manage up to 8 servers, locally and remotely, over VGA/USB interface. Connecting the servers to the KVM switch is made by VGA/USB modules and RJ-45 cables. The connection distance must not exceed 60 meters.

The DEXLAN DX-KVU5-8 switch is scalable. It can remotely control the servers over IP protocol, by adding optional IP modules (PN 066301) to the KVM.

Product features:

- VGA USB & PS2 combo console port
- 8 x server ports : RJ-45 for category 5 twisted-pair up to 60 meters
- Includes 8 x modules: VGA male/USB Type A male/RJ-45 female
- Switching operation: push button, hotkey sequence and OSD menu
- Remote access: add IP module (PN 066301)
- Maximum resolution: 1920 x 1080 9V/ 1A
- Dimensions: 432 x 156 x 43 mm/ 2.4 kg

## TECHNICAL CHARACTERISTICS

Brand : DEXLAN

Part number : DX-KVU5-8V2

### Main features :

Number of ports : 8

KVM keyboard/mouse connectors : USB

KVM video port : VGA

KVM over IP : No

Maximum resolution : 1920 x 1080

Rackmount : Yes

Number of concurrent users : 1

### Secondary features :

KVM over category 5 : Yes

Embedded cables : No

Push button switching operation : Yes

Hotkey switching operation : Yes

OSD switching operation : Yes

Smartphone switching operation : No

Softswitch switching operation : No

Remote control included : No
