

DESCRIPTION

This hybrid transceiver module uses a long-distance signal over multimode fiber, less expensive than single-mode. This feature can extend the communication distance to 2 kilometers, compared to the traditional 550-meter limitation.

Product features:

- Duplex fiber optic port with LC connectors
- Gigabit 100LX fiber link over 50/125µm multimode fiber optic cable
- Compliant with IEEE802.3z Gigabit Ethernet standard
- Wavelength: FP 1310 nm
- Frequency: 1.25Gbps
- Power supply: +3.3 V
- Compatible with the MSA (Multi Source Agreement)
- Hot-swappable
- Compliant with SFP standard (Small Form Factor Pluggable 55.5 x 13.5 x 8.5mm)
- Class 1 Laser product, compliant with EN 6025-1 standard

TECHNICAL CHARACTERISTICS

Brand : PLANET

Part number : MGB-SX2
