

DACOMEX Universel Key Lock for Kensington Wedge Nano slot

DESCRIPTION

Secure your entire computer fleet with the universal adjustable head lock for Kensington, DELL and HP

You manage a heterogeneous fleet of laptops, you want to secure each device with an anti-theft device without going into detail about the brand or the type of notch available on the laptop. Universal adjustable head lock is your best choice!

DELL notebooks and Ultrabooks are equipped with the new Noble Wedge mini notch (3.2 x 4.5mm), the new HP Nano has an even smaller notch (2.5 x 6mm) than the classic K-Lock type notches (7 x 3 mm) can no longer be used.

The new anti-theft device with adjustable head is also equipped with a security key lock with the "PASS" option and its 2 meter steel cord, it allows you to attach your computer to a fixed anchor point (foot of table, post, etc.)

Using a simple flat screwdriver select position 1 to adjust the head to the dimensions of the Noble Edge slots, position 2 for the Nano slots or position 3 for all the other K-Lock type slots

More product:

- Fits most laptop anti-theft slots
- "Push-to-Lock" locking, the key is only used for unlocking
