

## DESCRIPTION

Raritan's MasterConsole Digital KVM switch (MCD) is ideal for small to midsized businesses (SMB) who need to have a centralized point of access to multiple servers without the expense and clutter of a dedicated keyboard, mouse, and monitor for each computer or server. The MCD supports the highest HD video resolution of up to 1920x1080 via standard Category 5/6/6e cabling. The multi-format video interface supports both Analog VGA and Digital DVI, HDMI and DisplayPort. Stereo audio is also supported by using VGA combo cables or MCDs HDMI adaptors.

MasterConsole Digital KVM is available as a single-user switch and a dual-user switch to control multiple servers. It features KVM ports for 8, 16, or 32 servers and can be cascaded 2 levels to support up to 1024 connections at distances up to 150 feet (45 meters). Connecting to a computer is made easier with the use of standard Category 5/6/6e cables. MCD provides a friendly OSD (On-Screen Display) interface and hotkeys for quick and easy access connected computers. It is ideal for performing system maintenance, administration, running applications, and troubleshooting.

## TECHNICAL CHARACTERISTICS

Brand : RARITAN
Part number : MCD-216
AC input voltage : 100 - 240 V
Audio connections : Yes
Built-in display : No
DC input voltage : 12 V
Depth : 150 mm
Ethernet LAN : Yes
Ethernet LAN (RJ-45) ports : 16
Harmonized System (HS) code : 85176200
HD type : WUXGA
Height : 44 mm
Input current : 1.5 A
Keyboard port type : USB
Maximum resolution : 1920 x 1200 pixels
Mouse port type : USB
Power consumption (typical) : 65 W

Power source : AC

Product colour : Black

Rack capacity : 1U

Rack mounting : Yes

USB connector type : USB Type-A

Video port type : DVI-D

Weight : 2.01 kg

Width : 440 mm
