

DACOMEX TM350-WBT Trackball Mouse 2,4 Ghz and Bluetooth rechargeable

DESCRIPTION

Trackball and dual 2.4 GHz & Bluetooth connection!

Comfort of use - Thanks to its sculpted shape, handling is quick and intuitive. Controlled by the thumb, the DACOMEX TM350 Trackball offers handling closer to traditional mice. This feature will guarantee you a faster and, above all, more effective adaptation. Using a Trackball is a solution for people suffering from pain and cramps in the hand or wrist because it saves you from the repetitive movements of long periods of use. of a classic mouse.

Its 5 easy-to-reach buttons allow natural placement of the fingers without any contortion and therefore simple use. Added to this a non-slip and precise wheel, everything has been thought of for uncompromising user comfort.

Features - Bluetooth or 2.4 GHz radio connection? No more need to choose: a simple action via a button under the mouse allows you to switch from one connection to another. Multiple computers

? No need to multiply mice, the TM350's Bluetooth connection accepts 3 connection channels that can be switched with a simple click!

Its integrated 1000 mAh battery will make you forget the heavy hassle of replacing batteries!

Cleanliness - Because cleaning and disinfection of work equipment is important and dust and dead cells always end up accumulating in all trackballs, the TM350 ball is simply extracted by pressure under it.
