

Dual Rail 19" LCD Console + 8-Port KVM Switch VGA/PS2-USB

DESCRIPTION

The Dual Rail KVM console has 2 independant drawers. The first drawer includes a French layout keyboard that can be replaced by a Qwerty layout keyboard as an option. The drawer is also equipped with a touchpad. The second drawer is equipped with a TFT 19- LCD flat screen.

The DEXLAN console is 1U-high, for optimum space management in your cabinet. The KVM switch can control up to 8 computers via 8 combo cords included in the package. You can add another keyboard/ mouse console on the USB ports on rear.

Moreover, a specific space is dedicated to an IP module for Internet-based remote management.
