

DESCRIPTION

PoE+ extender kit over category 5 cable. You can install your device at 500 meters if needed.

Insert the PoE+ kit between the switch and the device so that you can install the latter at up to 500 meters over category 5 cable. The PoE+ capability can supply the power and transmit the data at the same time.

The kit includes two modules, a transmitter and a receiver. These modules can easily be installed, without any software, over the RJ-45 interface. We recommend that you use category 5 or category 6 copper twisted pair cable and RJ-45 modular plugs.

Product features:

- Compatible with the following standards : Long Range Ethernet IEEE 1901 - PoE+ 802.3at/af
- Input/ Output : RJ45 10/100 PoE+ 30W
- Solid wire cable is recommended
- Compatible with Fast Ethernet network without PoE up to 1000m
