

Joey 30 Mk3 Mobile Cart for 30x Devices - Mobile Classroom - FR

DESCRIPTION

Charge, store, secure, and transport up to 30 mobile devices at a more affordable price.

Benefits:

- Enjoy LocknCharge quality at an affordable price.
- Charge, store, secure, and transport 30 iPads, tablets, Chromebooks, and laptops.
- Large carrying baskets and storage racks are included in the price.
- Cables are neat and organized, and connecting devices is easy.
- Deploy your mobile devices in the classroom faster with top-loading.
- Compact, less cluttered mobile cart.

Smarter equipment:

- Save time, save money. Our goal is to save you valuable time and money every day. Our baskets allow for faster deployment and storage. Forget the hassle of charging and focus on your goals.
- Perfect for shared use. Not enough devices for everyone? No problem. You can easily share your mobile devices between multiple areas. Combining our baskets with our lightweight and maneuverable carts allows for quick, secure, and easy device transport.
- Top-loading. The lid of the Joey Secure Charging Carts folds completely down to the sides. Devices are fully accessible from all four sides for even faster deployment and storage, such as in the classroom. Plus, there's no need to bend down to remove devices. Your back thanks you, and you can stay relaxed.
- LocknCharge carrying baskets included for devices <13.5-14". These aren't your typical picnic baskets. LocknCharge baskets have slots for faster, safer, and more efficient device deployment. You save valuable time every day.
- Organized cables and power supplies stored separately. With our new "toolbox" design, power supplies are stored and hidden at the bottom of the cart under the removable tray for easy access to power supplies, cords, and cables without having to rummage around inside the cart. The new side passages provide better cable organization, allowing you to connect your devices faster after each use.
- External charging status display. You don't need to be a superhero to know the charging status of your devices. The ECO Safe Charge™ display on our Joey Carts is there for you.
- Compatible and efficient. The Joey mobile classroom cart is also suitable for larger devices (max. 405mm x 268mm x 24mm). Up to 30 iPads, tablets, Chromebooks, laptops, and other smart devices (with or without protective cases) can be stored and charged in Joey carts.
- Affordable. Enjoy all the benefits that have made LocknCharge carts famous for managing your mobile devices at a more affordable price.

- Safe power management. Universal charging (mains outlets). Protect against short circuits. ECO Safe Charge™ technology manages the power needs of virtually any device by staggering device charging. In addition, devices are not overcharged, protecting battery life.
- Durable and impact-resistant. Joey carts are made of high-quality welded steel and come with a 10-year warranty.
- Robust. Safely protect your devices in schools, hospitals, or businesses. Lock devices in the storage area with a padlock. An optional floor anchor kit secures the entire cart to the floor.
- Sustainable solution. Invest in a scalable solution to prevent your carts from becoming obsolete. Our racks and baskets are removable. Your cart adapts to your future needs and evolving devices and technologies (or even to store a Wi-Fi hotspot).
- Lock included. Our Joey Cart comes with a high-quality stainless steel keyed lock.
