

DESCRIPTION

An ergonomic rest which supports your forearms.

The Under Arm Support is an ergonomic rest that has been designed to support your forearms. The forearm rest quickly attaches to the front of your desk, instantly creating a padded desk extension which is perfect if you need the extra support. The rest is great for people who do not have armrests on their chair and helps to keep arms and wrists in a neutral position. The padded surface is far more comfortable to use than the hard cold surface of your tabletop, but also just as hygienic with its wipe-clean material.
