

BOSCH KBD-UXF

DESCRIPTION

With the new KBD-Universal XF keyboard Bosch introduces an additional way to control BVMS, Building Integration System (BIS) with Video Engine, DIVAR IP 3000, and DIVAR IP 7000.

User that already have experience with the typical DVR control can now use this keyboard to execute the typical DVR functions on a modern Video-over-IP management system.

The keyboard comes with jog shuttle, joystick 38 backlit keys, alarm buzzer, and allows the management of your video-over-IP devices which are used in a BVMS or DIVAR IP system.

Emulating a 4-axis HID joystick it allows smooth PTZ operation. The device can also be used together with ordinary PC peripheral devices such as keyboards, mouse, joysticks or other accessories.

KBD-Universal XF is USB powered and so requires only one cable.

It can be turned round so that both right- and lefthanded users can use all the functions with ease.

This simple, user-friendly and fully implementable keyboard allows a comfortable and intuitive management of CCTV applications from PC.

It is optimized for BVMS use cases.

For use cases with BIS - Video Engine a special printable keyboard layout is included in the BIS delivery.

TECHNICAL CHARACTERISTICS

Brand : BOSCH

Part number : KBD-UXF

Caractéristiques :	
Type :	Joystick
Certification :	CE
Connectivity technology :	Wired
Depth :	224 mm
Easy to install :	Y
Height :	89 mm
Operating temperature (T-T) :	0 - 45 °C
Power consumption :	350 mA
Product colour :	Black
Quantity per pack :	1 pc(s)
USB port :	Y
Weight :	1.4 kg
Width :	379 mm
