

DESCRIPTION

The IPOE-E174 PoE switch has an IP-30 protection index. The components can stand extreme temperatures that can be found in storage and production facilities, from -40°C to +75°C

Moreover, the switch can be installed outdoors if protected by a weatherproof housing.

The switch operates with a 30-W Gigabit PoE+ injector. In this configuration, the automatic PoE management will provide the power to only 2 x PoE 802.3af devices.

You can as well build up an up to 200-meter link by placing the switch in the middle (100 meters upstream/ 100 meters downstream).

Product benefits:

- 1 x RJ-45 Gigabit Ultra PoE input, 60W max.
- 4 x RJ-45 Gigabit PoE+ outputs, 30W max.
- PoE power usage LED indicator (25%, 50%, 75%)
- Extreme heat/ cold operation temperature range: -40~75°C
- Automatically detects the connected powered devices (PD)
- Long-distance link: 100 meters upstream and 100 meters downstream from the switch

TECHNICAL CHARACTERISTICS

Brand : PLANET

Part number : IPOE-E174
