

DESCRIPTION

The PLANET GSD-604HP is a 6-port Gigabit switch, with a compact metal housing. The switch supports 4 PoE+ ports.

The PLANET GSD-604HP was designed to build-up small installations including video surveillance cameras and wireless access points. The PoE+ function makes it easy to implement, since data and power are transmitted over a single twisted-pair cable. The switch can supply the power to 4 x IEEE802.3af/at-compliant devices.

In addition, the switch supports VLAN mode, which isolates each device from another, thus ensuring a higher connection quality.

Product benefits:

- 4 x 10/100/1000Mbps PoE+ ports supplying 30W each
- 1 x 10/100/1000Mbps port for NVR connection
- 1 x Uplink port for Internet connection
- VLAN mode (with micro switch) ensuring a higher quality and reliability of the connections
- Compact size, metal housing
- Fanless design, silent operation

TECHNICAL CHARACTERISTICS

Brand : PLANET

Part number : GSD-604HP
